

Acrylic Sign Making

Lightweight, Thin and Easy to Mount

Acrylic plastic signs have an extremely slick, smooth surface which naturally displays a premium quality appearance. Acrylic signs are lightweight, thin and easy to mount.

In recent years, the raw materials and manufacturing processes of Acrylic sheeting have vastly improved making Acrylic signs a highly sought after product. The pigments in Acrylic wall signs hold their colors better than ever before. Dimensional stability has also improved making mounting and installations more secure.

Acrylic plastic signs are inexpensive to purchase, yet highly durable and professional in appearance. Acrylic plastic signs are often used inside offices, retail stores, as hanging signs, promotional signs, sale signs, directional signs, point-of-purchase signs, identification signs, high-end trade show signs, interior signage, exterior signage, or anywhere you need to professionally display your message.

Features

- Acrylic is a UV stable, highly durable, outdoor plastic sign material
- The material is completely waterproof
- It is ideal for lighted sign displays
- Acrylic has a high tolerance for cold and hot weather temperature extremes
- Plastic signs will last indefinitely indoors
- The Acrylic sign surface has a rich, high gloss appearance
- Acrylic wall signs also come in matte finishes
- Small Acrylic wall signs come standard in 1/8" thickness
- Medium size Acrylic plastic signs are usually 3/16" thick

Normally, Acrylic plastic signs are finished with a bevel effect. This gives it a finished, professional appearance that looks great on doors and in hallways.

- **Individual Acrylic Letters** Stud-mounted directly to your wall, or with spacers to float the sign, individual acrylic letters produce a shadow effect that adds depth and interest.
- **Cut Acrylic Logo Signs** Your logo, laser cut from solid acrylic sheets from 1/4 to 1 in thickness, painted/printed to your colors, and pin mounted to "float" each letter from the wall.
- **Metal Laminate Letters** " For a handsome, elegant look, add metal, laminate faces in brushed or polished aluminum, or brushed or polished brass, to your acrylic signs.
- **Acrylic & Metal Panels** " With your sign installed on an acrylic or metal panel, the depth and dimension are increased, offering an entirely different appearance. Each letter is assembled with precision on the panel which can be made from a wide variety of materials, colors and finishes.
- **Stand-Off Hardware** " A variety of architectural stand-off hardware in brushed stainless steel or brass can be used to install your acrylic signs or logos.
- **Lighted Acrylic Signs** " Custom acrylic signage can be backlit with LEDs to give the same feel as fine artwork hung in a gallery. It makes quite an impression.

Choose from clear acrylic signs, frosted acrylic signs, standard acrylic sheet colors, or opt to have your acrylic logo or signage painted in your custom-matched PMS colors.
